## EDUCATION

**DUZCE UNIVERSITY**
Computer Science
Oct 2019 - June 2024 | Duzce, TR

**UNIVERSITY OF JAEN**
Computer Science
Sep 2021 - Jan 2022 | Jaen, SP
Exchange Student

## LINKS

Github: /burakorkmez
LinkedIn: /burakork
Portfolio: burakorkmez.com

## SKILLS

**PROGRAMMING**
Proficient
HTML • CSS • JavaScript • TypeScript •
Node.js • Express • React.js
Next.js • MongoDB • GraphQL
• PostgreSQL
Intermediate:
EJS • Bootstrap • Tailwind • Python
• Docker

## EXPERIENCE

**FIKRIMUHAL** | Front-End Engineer
Aug 2022 - Oct 2022 | Istanbul, TR
- Leveraged advanced Front End techniques to built and deploy a highly interactive company website, enhancing the user experience and driving engagement.
- Utilized Remix.js, GraphQL and Express.js to contribute an integral tool that delivered seamless performance and functionality.
- Incorporated Jenkins and AWS S3 into the CI/CD process, streamlining deployment and enabling rapid iteration

**SEGMENTIFY** | Front-End Engineering Intern
May 2022 - Aug 2022 | Istanbul, TR
- Did multiple integrations to given e-commerce websites which included complex helper functions, DOM manipulation, and data fetching.
- Analyzed the given algorithm, then built multiple fully responsive search boxes, sliders and banners with the given UI design.
- Implemented a Dashboard Efficiency Logger (using JavaScript) tracking interactions (clicks, keypresses).

**UNIVERSITY OF JAEN** | Data Structures & Algorithm Assistant
Sep 2021 – Dec 2021 | Jaen, SP
- Helped a class of 20 students to gain a deeper understanding of DSA.
- Designed weekly material, lesson plans, and weekly homework assignments that averaged a 90% completion rate.

## PROJECTS

**BINTEREST** | React, Sanity, Tailwind CSS
- Developed a Pinterest clone app using React, Sanity, and Tailwind CSS, providing users with a familiar and intuitive interface for creating, commenting, and saving posts. with all the available trailers and displays them in sliders.
- Utilized Tailwind CSS to create a visually appealing and responsive design that adapts to a variety of screen sizes and devices.

**GET INFORMED** | Next.js, TypeScript, Markdown, Nodemailer
- Wrote a variety of posts on the topic of system design, demonstrating expertise in the field and providing valuable insights and information to readers.
- Implemented Markdown support to allow for easy and efficient creation of blog posts, with the ability to include code snippets and other multimedia elements.
- Leveraged advanced features of Next.js, such as server-side rendering and automatic code splitting, to deliver a smooth and seamless user experience.

**MANAGE PROJECT** | React, Firebase
- A friendly project managing app that allows users to create projects and assign them to their teammates.
- Real time actions are available such as online users.
